DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 and 5-7, drawn to a method of operating a fuel cell comprising the steps of changing the anode to a cathode, and changing the cathode to an anode.

Group II, claims 2, 8, 11 and 14, drawn to a method of operating a fuel cell comprising the steps of inverting two sides of the membrane electrode assembly.

Group III, claims 3, 9, 12 and 15, drawn to a method of operating a fuel cell comprising the steps of inverting two sides of the cell module.

Group IV, claims 4, 10, 13 and 16, drawn to a method of operating a fuel cell comprising the steps of inverting polarities of a load driven by the fuel cell and inverting the direction of an electric current generated by the fuel cell.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-IV each overlap in scope with the subject matter recited in claim 1. However, this subject matter is at least rendered obvious by JP 5-129028 and JP 59-171474, as noted in the International Preliminary Examination report.

Art Unit: 4111

Accordingly, groups I-IV lack a common special technical feature that makes a contribution over the prior art.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
